SmartWash Laundry: three initiatives, one genuine transformation

Initiative A

Scan paper receipts

Digitization | Rejected

Receipts are easier to store, but the customer journey stays the same.

Initiative B

Buy tablets for employees

Digital improvement | Rejected

Information is portable, but requests, assignment and updates stay manual.

Initiative C | Selected

Digital pickup and delivery service

Digital transformation

Redesigns the end-to-end journey using technology, automation and data.

Business problem and 5W2H

Customers phone in requests, get no confirmation or tracking, and the company cannot see where delays happen.

What	Online pickup and delivery with tracking and notifications
Why	Cut manual work, improve customer experience, speed up service
Who	Customers, drivers, laundry staff, operations manager
Where	Pickup at the customer; processing at the branch on a digital platform
When	Starts at the pickup request; pilot in one area before expanding
How	Online request, driver assignment, updates, tracking, feedback
How much	Medium cost: platform, staff training, automation tools

Current customer journey and pain points

Every waiting stage leaves the customer uncertain, and nobody asks for feedback.

Stage	Emotion	Pain point
Need	Neutral	No easy way to request the service
Request	Uncertain	Manual phone requests take time
Confirmation	Frustrated	No instant confirmation
Pickup	Worried	No tracking or pickup updates
Processing	Anxious	No status updates
Delivery	Relieved	Delivery delays and poor communication
Feedback	Indifferent	Feedback is rarely collected

Improved journey and automation process

New journey

- Request online 24/7 and get an instant order number
- Confirmation and pickup time arrive automatically
- Track the driver and the order status live
- Rate the service in the app

Moment of truth

Real-time order tracking and delivery updates

Automation: 6 steps

1. Google Forms: customer submits the request
2. Google Sheets: order saved automatically
3. Make.com + email: driver assigned and notified
4. Email: customer receives confirmation with Order ID
5. Make.com + email: status update (Processing to Ready)
6. Google Forms + email: feedback form after completion

KPIs, charts and AI feedback findings

20
orders, 17 completed

29.5 h
average turnaround

3.82 / 5
average rating

50%
Wash & Fold share of orders

Average turnaround by driver

AI feedback findings

- Delays and missing updates drive the negative comments
- 3 of 10 comments are High urgency: no update, unconfirmed pickup, missing item
- Speed and professional staff drive the positive ones

Recommendations and success measure

1

Automatic notifications

Confirmation, pickup, ready, delivered. SW-008 was cancelled for an unconfirmed pickup, and 4 comments cite missing updates.

2

Pilot delay monitoring in South

South averages 39.3 h and a 2.5 rating, versus 22.8 to 25.3 h elsewhere. Review driver workload and routes first.

3

Close the quality loop

Item checklist, automatic feedback form and monthly AI review. One order arrived with a missing item.

Success measure (proposed target)

Cut average turnaround from 29.5 h and lift the rating from 3.82 toward 4.5 during the pilot.
